

Checklist on Installation in Singapore: Planning, Systems & Compliance

This checklist is designed to guide homeowners through the **complete CCTV installation process for landed properties in Singapore**. It ensures that every critical step — from site survey to final handover — is carried out systematically, securely, and with professional standards. By following this list, you can confirm that your installation is thorough, covers all risk areas, and meets your home's security requirements.

LANDED HOME CCTV INSTALLATION CHECKLIST

I-Weblogic Pte Ltd | +65 87827613 | Klein | Email: info@i-weblogic.com

1. INITIAL SITE SURVEY & RISK ASSESSMENT

- Walkthrough of property exterior & interior
- Identify vulnerable entry points (gates, doors, windows)
- Assess lighting conditions for day/night visibility
- Document risk areas and homeowner concerns

2. CAMERA PLACEMENT & COVERAGE STRATEGY

- Position cameras for full perimeter coverage
- Ensure overlap to eliminate blind spots
- Select appropriate camera types (dome, bullet, PTZ)
- Confirm privacy zones (avoid neighbor intrusion)

3. CABLING & INFRASTRUCTURE SETUP

- Plan cable routes (concealed & weatherproof)
- Install structured cabling with surge protection
- Connect to NVR/DVR with backup power supply
- Verify internet connectivity for remote access

4. SYSTEM CONFIGURATION & PDPA COMPLIANCE

- Configure recording schedules & motion detection
- Set up secure user accounts & access levels
- Enable encryption and password protection
- Ensure compliance with Singapore PDPA guidelines

5. FINAL TESTING & HANDOVER

- Test live feed, playback, and alerts
- Validate coverage during day & night conditions
- Provide homeowner training on system use
- Deliver documentation & warranty details
